

Contents

The contents of the root directory are as follows:

readme.txt	installation instructions and listing of the contents
\Fuel	the directory contains inputs/outputs for the generation of the WIMS fuel table
\Kinpar	the directory contains inputs/outputs for the generation of the kinetics-parameter table with KINPAR
\Matlib	the directory contains inputs/outputs for the generation of the material library
\Micdep_F	the directory contains inputs/outputs for the generation of the WIMS micro-depletion table for the fuel
\Micdep_R	the directory contains inputs/outputs for the generation of the WIMS micro-depletion table for the reflector
\Reference	the directory contains inputs/outputs for a sample WIMS run for the fuel
\Reflector	the directory contains inputs/outputs for the generation of the WIMS reflector table
\Wimsgrid	the directory contains inputs/outputs for the generation of the WIMS grid-based fuel
\Wimspar	the directory contains inputs/outputs for the generation of the WIMS fuel tables with WIMSPAR and CELLPAR
