Dear Sir or Madam:

Entergy's August 17, 2004 letter (CNRO-2004-00052, Reference 1) responded to the referenced letters 3-6 containing requests for additional information (RAIs) for RAIs 5 and 9 and others. In that response, Entergy provided detailed responses for RAI 5 for Waterford 3 and RAI 9 for ANO that were representative for all of our ENS units. In a telephone conversation August 25, 2005 between Entergy (L. A. England) and M. H. Chernoff and others of the NRC NSIR staff, NRC agreed that these responses were acceptable in content and level of detail but requested the site specific language for the remaining ENS units not covered by that response, including Sections 1.1 and 10.1, be provided for NRC examination prior to our formal submittal of revised Security Plans. This response updates or clarifies those previous responses pursuant to the August 25, 2004 telephone conversation.

With this submittal, and some editorial changes noted during the call, Entergy understands there are no further issues with respect to our April 29, 2004 submittal. Accordingly, each Entergy site will provide a revised Security Plan, under penalty of perjury, that incorporates all of our required RAI responses by September 9, 2004.

This letter includes new commitments as summarized in the attachment. If you have any questions or require additional information, please contact Mr. Les England at 601-368-5766.

Sincerely,

for F. G. Burford
