Thanks for the clarifications.

The letter that Sue is referring to is still in draft. I will forward when available.

Bill

Bill- see second paragraph below. She wants the information documenting the most recent fish kill- the one that was being documented while she was at this site. The attachment you sent was dated April 2001- this is about an "old" fish kill.

Thanks Sue for the clarification.

Kim - This is pretty much the same as what I pulled off ADAMS. I had seen all of it and had copied most of it during the site visit. I was trying to dig up more information...but this seems to be all that's out there & is good enough.

I DO still want to receive a copy of the letter(s) [when they are issued] regarding the most recent fish kill (the one that was being documented while were on site). I also still want to receive information on what AmerGen's procedure is for dealing with fish kills (whether they look for them, how they are reported, etc.). These two things are already on your list.

- Sue

Subject: Fish Kill Letter

Attached is a letter that was sent from Exelon to IEPA in April 2001 regarding a 2000 Clinton Lake Fish Kill. It is in the public record.

According to our records, this was handed over to your team during the ESP Site Visit. Is this the same report that is referenced in your action items list #5 or was the team looking for a similar letter regarding a more recent event?

If you should have any questions, please feel free to contact me at any time.

Bill
