Here is the response from Mr. Tardiff on your questions:

Requested data will only be in the form of questions on existing vehicle barrier systems, checkpoints, culverts and waterborne approaches. Information in writing past that of what is in the application will probably not be required.

Accumulation of data refers to the security analyses of the physical characteristics of the site which may reveal areas of potential vulnerability.

Nanette -  
Thanks for the heads up on the May 11-12 Site Visit info.

However, the info prompts a few questions.

- 1) Can you give me an approximate head count for the tours each day?
- 2) Can we get a little more guidance on what might constitute the requested/needed Security "data"?
- 3) What topics might fit into the safeguards information arena "discussions and accumulation of information"?

Repeat of the provided info... (for ease of reference)

=====  
=====  
=====

Security - May 12

Need data to analyze:

- 1) air approaches to the site and PA
- 2) water approaches to the site and PA
- 3) Land approaches to the site and PA
- 4) Identification of offsite response resources

A physical walk/drive around the OCA and PA.

Consider discussions and accumulation of information to go to the Safeguards Information arena.
