SUBJECT: Supplemental Response to Requests For Additional Information Re: Indian Point
Units 1, 2 and 3 Security Plan (TAC Nos. MC2929 and MC2930)

Dear Sir:

Entergy Nuclear Operations, Inc., (ENO), is in receipt of requests for additional information (RAIs) (References 1 through 4). Our initial responses to these RAIs (References 5 through 10) identified a number of issues which were considered to be generic issues that were to be resolved using the security frequently asked question (SFAQ) process.

Those generic issues have now been resolved using the SFAQ process. Also, the NRC review team, by telephone conference, requested that we provide additional detail to earlier responses. The information provided in Attachment 1 to this letter completes our responses to the open NRC RAIs by agreeing to adopt the agreed upon language for the generic RAIs and providing the requested additional detail. Each RAI, for which we are updating our response, is identified by the Physical Security Plan (PSP) or Safeguards Contingency Plan (SCP) section number referenced in the original RAI. In addition, where our earlier responses simply referred to correspondence containing mutually acceptable language, we are updating those responses to reflect the actual text that will be inserted into the PSP and SCP.

This letter contains one new commitments. As noted in references 4 and 5, revised plan pages will be submitted when all RAI questions are resolved. If you have any questions or require additional information, please contact Mr. Patric W. Conroy, Manager, Licensing at (914) 734-6668.

I declare under penalty of perjury that the foregoing is true and correct. Executed on August 27, 2004.

Sincerely,

Fred R. Dacimo
Site Vice President
Indian Point Energy Center
