Fitness-for-Duty Program Performance Report

For the Period January - June 2004

Dear Sir or Madam:

This letter transmits the James A. FitzPatrick, Indian Point 1, Indian Point 2, Indian Point 3, Pilgrim, and Vermont Yankee Fitness-for-Duty Program performance reports for the period from January through June 2004 in accordance with the requirements of 10 CFR 26.71(d). The FitzPatrick report is Attachment I; the combined Indian Point 1, 2, and 3 report is Attachment II; the Pilgrim report is Attachment III, and the Vermont Yankee report is Attachment IV.

A021

There are no new commitments made in this letter. If you have any questions, please contact Ms. Charlene Faison at 914-272-3378.

Very truly yours,

Michael R. Kanşler

President

Entergy Nuclear Operations, Inc.

JAMES A. FITZPATRICK NUCLEAR POWER PLANT

FITNESS FOR DUTY PROGRAM PERFORMANCE REPORT FOR JANUARY THROUGH JUNE 2004

ENTERGY NUCLEAR OPERATIONS, INC. JAMES A. FITZPATRICK NUCLEAR POWER PLANT DOCKET NO. 50-333 DPR-59

Entergy Nuclear Operations, Inc.
James A. FitzPatrick Nuclear Power Plant
Fitness-for-Duty Program Performance Report
For the Period January through June 2004

INTRODUCTION

10 CFR 26.71(d) requires that nuclear power plant licensees periodically collect, compile and submit Fitness-for-Duty performance data. Specifically, this performance data must include:

- 1. Random testing rate;
- 2. Drugs tested for and cutoff levels, including results of tests using lower cutoff levels;
- 3. Workforce population tested;
- 4. Numbers of tests and results by population and type of test (i.e., pre-access, random, for-cause, etc.);
- 5. Substances identified;
- 6. Summary of management actions; and
- 7. A list of events reported.

Fitness-for-Duty performance data for Entergy's James A. FitzPatrick Nuclear Power Plant for the period January through June 2004 are provided below and in the attached tables. Data on random testing rate, a summary of management actions, and a list of events reported (items 1, 6 and 7) are given below. Data for the remaining items (2, 3, 4 and 5) are given in the attached tables.

An additional section not required by 10 CFR 26 is included in this report. The additional section summarizes events related to the FitzPatrick Fitness-for-Duty program and lessons learned.

Entergy considers all contractors to be short-term contractors for the purposes of the Fitness-for-Duty Program. For this reason, the attached tables show "N/A" for data associated with long-term contractors.

RANDOM TESTING RATE

For this period, 27.3% of employees were tested randomly. For this period, 59.6% of contractors were tested randomly. The relatively higher rate for contractors is due to the procedural safeguards in place to accommodate delayed testing of occasional vendors.

SUMMARY OF MANAGEMENT ACTIONS

Entergy used the definition of "Management Actions" implicit in 10 CFR 26.27 ("Management actions and sanctions to be imposed") to determine the content of this section.

Pre-Access Testing

Eleven pre-access tests were administered for employees and 30 for contractors. All tests were negative.

Employee Random Testing

A total of 227 employee random tests were administered. All tests were negative.

Contractor Personnel Random Testing

A total of 42 contractor random tests were administered. All tests were negative.

For Cause Testing

Two for-cause tests performed during this period. One (1) employee for aberrant behavior, test results were negative. One (1) contractor had the smell of alcohol, and tested positive for alcohol. Access was denied for up to 1 year.

Follow Up Testing

There were six (6) follow up tests administered this reporting period on 3 employees in the follow-up testing program, and all test results were negative.

Other

This category includes tests repeated because the results of the specimen were negative but the specimen was determined by the laboratory to have either a low specific gravity or a low concentration of creatinine. There were 5 atypical tests, (4–employee and 1-contractor) performed, and all test results were negative. There were 2 Department of Transportation (DOT) tests performed (which had a lower alcohol cutoff level at 0.02% BAC). The test results were negative.

EVENTS REPORTED

None

LESSONS LEARNED AND PROGRAM EVENTS

None

Entergy Nuclear Operations, Inc. Indian Point Energy Center Units No.1, 2, 3 Fitness-For-Duty Program Performance Report For the Period January through June 2004

INTRODUCTION

10 CFR 26.71(d) requires that nuclear power plant licensees periodically collect, compile and submit Fitness-For-Duty performance data. Specifically, this performance data must include:

- 1. Random testing rate;
- 2. Drugs tested for and cutoff levels, including results of tests using lower cutoff levels and tests for other drugs;
- 3. Workforce population tested;
- 4. Numbers of tests and results by population and type of test (i.e., pre-access, random, for cause, etc.);
- 5. Substances identified;
- 6. Summary of management actions; and
- 7. A list of events reported.

Fitness-For-Duty performance data for Entergy's Indian Point Energy Center for the period from January through June 2004 are provided below and in the attached tables. The random testing rate, a summary of management actions, and a list of events reported (items 1,6,and 7) are given below. Data for the remaining items (2,3,4, and 5) are given in the attached tables.

An additional section not required by 10CFR26 is included in this report. The additional section summarizes events related to the Indian Point Energy Center Fitness-For-Duty program and lessons learned.

Entergy considers all contractors to be short-term for the purposes of the Fitness-For Duty program. For this reason, the attached tables show "N/A" for data associated with long-term contractors.

RANDOM TESTING RATE

For this period 26.6% of the personnel in the testing pool were tested randomly.

SUMMARY OF MANAGEMENT ACTIONS

Entergy used the definition of "Management Actions" implicit in 10 CFR 26.27 ("Management actions and sanctions to be imposed") to determine the content of this section.

Pre-Access Testing

A total of 294 pre-access tests were performed. There were three (3) confirmed positive tests for contractors: two (2) for marijuana and one (1) for cocaine. All individuals were denied access for three (3) years. All employee pre-access test results were negative.

Employee Random Testing

There were 364 random tests conducted for licensee employees. All employee random test results were negative.

Contractor Personnel Random Testing

There were 78 contractor random tests conducted. One contractor was positive for marijuana and was denied access for the period of three (3) years.

For-Cause Testing

There were seven (7) for-cause tests performed during this period. All seven (7) tests were on employees with behavior concerns. All For-Cause test results were negative.

Follow-up Testing

There were 20 follow-up tests (15-employee and 5-contractor) conducted during this period. All Follow-up test results were negative.

Other

This category includes tests repeated because the results of the specimen were negative but the specimen was determined by the laboratory to have either a low specific gravity or a low concentration of creatinine. There were two tests (1-employee, 1-contractor) conducted. All test results were negative.

EVENTS REPORTED

There were no reportable events during this period. No performance indicators were identified during this period.

PILGRIM NUCLEAR POWER STATION

FITNESS FOR DUTY PROGRAM PERFORMANCE REPORT FOR JANUARY THROUGH JUNE 2004

ENTERGY NUCLEAR OPERATIONS, INC. PILGRIM NUCLEAR POWER STATION DOCKET NO. 50-293 DPR-35

Entergy Nuclear Operations, Inc.
Pilgrim Nuclear Power Station
Fitness-For-Duty Program Performance Report
For the Period January through June 2004

INTRODUCTION

10 CFR 26.71(d) requires that nuclear power plant licensees periodically collect, compile, and submit Fitness-For-Duty performance data. Specifically, this performance data must include:

- 1. Random testing rate;
- 2 Drugs tested for and cutoff levels, including results of tests using lower cutoff levels and tests for other drugs;
- 3 Workforce population tested;
- 4. Numbers of tests and results by population and type of test (i.e. pre-access, random, for cause, etc.);
- 5. Substances Identified;
- 6. Summary of management actions;
- 7. A list of events reported.

Fitness-For-Duty performance data for Entergy's Pilgrim Nuclear Power Plant for the period from January through June 2004 are provided below and in the attached tables. The random testing rate, a summary of management actions, and a list of events reported (items 1, 6, and 7) are given below. Data for the remaining Items (2,3,4, and 5) are given in the attached tables.

An additional section not required by 10CFR26 is included in this report. The additional section summarizes events related to the Pilgrim Fitness-For-Duty program and lessons learned.

Entergy considers all contractors to be short-term for the purposes of the Fitness-For-Duty program. For this reason, the attached tables show " N/A " for data associated with long-term contractors.

RANDOM TEST RATE

During this period, 20.0% of the total workforce was tested.

SUMMARY OF MANAGEMENT ACTIONS

Entergy used the definition of "Management Actions" implicit in 10 CFR 26.27 ("Management actions and sanctions to be imposed") to determine the content of this section.

Pre-Access Testing

During this period, a total of 150 pre-access tests were administered. 47 tests were for licensee employees and the other 103 tests were contractors. All test results were negative.

Employee Random Testing

During this period, there were 125 random tests conducted on licensee employees. All test results were negative.

Contractor Personnel Random Testing

There were 34 contractor random tests conducted during this period. All test results were negative.

For-Cause Testing

There were a total of 4 for-cause tests performed during this period. One was a licensee employee, and the result was negative. The other 3 were contractors and the results were all negative.

Follow-up Testing

A total of 8 follow-up tests were performed during this period. 6 tests were performed on 4 licensee employees in the follow up program and all were negative. 1 contractor was tested twice in the follow up program and results were negative.

Other

This category includes tests conducted based on self-reporting to security and/or tests repeated because the results of the specimen were negative but the specimen was determined by the laboratory to have either a low specific gravity or a low concentration of creatinine (integrity checks). For this period, there were 2 tests conducted (repeated) due to low creatinine. Both results were negative.

EVENTS REPORTED

There were no events during this time period (January through June) that required reporting to the NRC.

LESSONS LEARNED AND PROGRAM EVENTS

No negative performance indicators were identified during this period.

VERMONT YANKEE NUCLEAR POWER STATION

FITNESS FOR DUTY PROGRAM PERFORMANCE REPORT FOR JANUARY THROUGH JUNE 2004

ENTERGY NUCLEAR OPERATIONS, INC. Vermont Yankee Nuclear Power Station Docket No. 50-271 DPR-28

Entergy Nuclear Operations, Inc.
Vermont Yankee Nuclear Plant
Fitness-For-Duty Program Performance Report
For the Period January through June 2004

INTRODUCTION

10 CFR 26.71(d) requires that nuclear power plant licensees periodically collect, compile and submit Fitness-For-Duty performance data. Specifically, this performance data must include:

- 1. Random testing rate;
- 2. Drugs tested for and cutoff levels, including results of tests using lower cutoff levels and tests for other drugs;
- 3. Workforce population tested;
- 4. Numbers of tests and results by population and type of test (i.e., pre-access, random, for cause, etc.);
- 5. Substances identified;
- 6. Summary of management actions; and
- 7. A list of events reported.

Fitness-For-Duty performance data for Entergy's Vermont Yankee Nuclear Plant for the period from January through June 2004 are provided below and in the attached tables. The random testing rate, a summary of management actions, and a list of events reported (items 1,6,and 7) are given below. Data for the remaining items (2,3,4, and 5) are given in the attached tables.

An additional section not required by 10CFR26 is included in this report. The additional section summarizes events related to the Vermont Yankee Fitness-For-Duty program and lessons learned.

Entergy considers all contractors to be short-term for the purposes of the Fitness-For Duty program with the exception of Wackenhut security contractors. They alone are considered long term contractors.

RANDOM TESTING RATE

For this period 28.6% of the personnel in the testing pool were tested randomly.

SUMMARY OF MANAGEMENT ACTIONS

Entergy used the definition of "Management Actions" implicit in 10 CFR 26.27 ("Management actions and sanctions to be imposed") to determine the content of this section.

Pre-Access Testing

A total of 904 pre-access tests were performed. There were nine (9) confirmed positive tests for contractors: four (4) for marijuana > 50 ng; three (3) for marijuana > 100 ng; one (1) for alcohol and one (1) for cocaine. All individuals were denied access for three (3) years. All employee pre-access test results were negative.

Employee Random Testing

There were 172 random tests conducted for licensee employees. All employee random test results were negative.

Contractor Personnel Random Testing

There were 38 long-term contractor random tests and 123 short-term contractor random tests conducted. All contractor random tests were negative.

For-Cause Testing

There were ten (10) for-cause tests performed during this period. Three (3) were conducted on employees, two (2) for behavior concerns and one (1) post accident. All test results were negative.

Three (3) were conducted on long-term contractors; two (2) for behavior concerns and one (1) post accident. All test results were negative.

Four (4) were conducted on short-term contractors for behavior concerns. Two (2) of the short-term contractor tests resulted were positive for alcohol. One (1) of these short-term contractors also refused a drug collection which resulted in a permanent denial of unescorted access. The other short-term contractor was denied for one year.

Follow-up Testing

There were 45 follow-up tests (7 employee, 0 long-term contractor and 38 short-term contractor) conducted during this period. One employee follow-up test was positive for alcohol. This individual was permanently denied unescorted access. All contractor follow-up test results were negative.

Other

This category includes tests repeated because the results of the specimen were negative but the specimen was determined by the laboratory to have either a low specific gravity or a low concentration of creatinine. There were four (4) tests conducted. All test results were negative.

EVENTS REPORTED

There were no reportable events during this period. No performance indicators were identified during this period.
