Tony -

I searched my files and e-mail archives, and did not find what I would call full procedures for ROW maintenance.

I did find two short documents that appear to be generic requirements or specifications that would be attached to any maintenance contracts - one is for foliar herbicide applications and the other is for basal herbicide applications. These are useful, but do not represent a complete set of procedures or guidelines.

If you find a record of sending something different, please let me know.

Thanks,

Mike Sackschewsky
