Division of Nuclear Safety
476 Allendale Road
King of Prussia, PA 19406-1415

Dear Mr. Parker,

Issue per your e-mail: Re: the address issue, I just realized during my review that the 150 Hilltop Road was the old address that you moved from in/around 10/2003. In that Amendment No. 3 dated 10/17/03, we added the new address in Mahwah, NJ (see your letter dated 9/23/03). The old address was left listed because it was required that you decommission the area after you vacated it. I don't see any record that we have released that old address for unrestricted use. Did y'all survey it out? Do you still have control of that area?

Response: With regard to the clarification of addresses I can respond as follows. The 150 Hilltop location was used to store sealed sources and tritium ampoules. Occasionally, the sealed sources were used to check instruments. No other radiological activities were performed. A release survey was performed in October 2003 but has not been submitted to the NRC. This address should remain on the license until we submit the narrative and release survey information.

We look forward to receiving our new license. Should you have any questions with regard to the application please contact Mr. Robert Flournoy at 702-451-2309 or Mr. Keith Rule at 609-937-0558.

Sincerely,

Keith Rule
