**Subject: Beaver Valley Power Station (BVPS), Unit No. 1 and No. 2
BV-1 Docket No. 50-334, License No. DPR-66
BV-2 Docket No. 50-412, License No. NPF-73
Supplemental Reply to Request for Additional Information re:
Draft BVPS Physical Security Plan submitted April 28, 2004**

On August 16, 2004, FirstEnergy Nuclear Operating Company (FENOC) provided a response to issues contained in a Request for Additional Information (RAI) from the Nuclear Regulatory Commission (NRC) staff. The subject of the RAI was the draft Beaver Valley Power Station (BVPS) Physical Security Plan submitted to the NRC in a letter dated April 28, 2004 (L-04-043).

Several issues were identified in that response as still being industry open items. Those issues have now been resolved; therefore, the responses for those remaining items, as well as several clarifications for previously addressed items are provided in a safeguarded attachment to this letter.

In accordance with 10 CFR 73.21, the enclosure to this document has been determined to contain Safeguards Information, and is thereby exempt from public disclosure.

There are no regulatory commitments contained in this letter. If there are any questions concerning this matter, please contact Mr. Kenneth E. Halliday, Manager Nuclear Security at 724-682-5072.

I declare under penalty of perjury that the foregoing is true and correct. Executed on August 30, 2004.

Sincerely,

Thomas S. Cosgrove
