Subject: Docketing of documents

Tony,

The attached file has two parts. The first part lists documents that we have received and which we intend to docket. First I want to be sure Dominion has no concerns with the docketing of this information (I don't believe there is any proprietary information involved). Second - for some of the documents I need to know what the source document was. This need is noted in the column that describes the document. This information is necessary so that the ADAMS entry will make sense to anybody who accesses it - particularly for those outside NRC.

As we discussed, I'll be at PNNL next week. But I can be reached in an emergency through Mary Ann. Jack Cushing will be backing me up here.

Andy Kugler
