**UFTR Site-Specific  
Compensatory Measures  
for Physical Security  
— Updated Final —**

Re: University of Florida Training Reactor (UFTR) License No. R-56, Docket No. 50-83

This package contains the updated final (proposed) Site-Specific Compensatory Measures Implementation Plan for physical security at the University of Florida Training Reactor (UFTR) facility. Many of the final proposed commitments are already addressed in the existing UFTR *Physical Security Plan* (PSP). This set of compensatory measures is considered as an addendum to the approved PSP and will be so labeled when finalized after review and approval.

The proposed commitment is for full implementation of these preliminary site-specific compensatory measures (CMs) by September 20, 2004. This implementation date is to allow updating procedures and other documents per the CMs.

These changes will increase the security level represented in the current UFTR *Physical Security Plan* as intended. If there is need for further information, please let us know.

Sincerely,

William G. Vernetson  
Director of Nuclear Facilities
