

SUMMARY OF INFORMATION COLLECTION REQUEST

Title: 10 CFR 34, "Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations," Final OCP

Current Burden/Responses: 139,644 hours/546 responses

Proposed Burden/Responses 244,048 hours/867 responses (67 NRC licensee responses + 126 recordkeepers and 220 Agreement State licensee responses + 454 recordkeepers)

Burden Attributable to Third-Party Collections: None

Frequency of Response: On occasion, every 10 years

Reasons for Changes in Burden/Responses:

The number of NRC licensees has increased from 104 to 126, resulting in a burden increase of 8,345 hours from 39,990 to 48,335 hours. The number of Agreement State licensees has increased from 260 to 454, resulting in a burden increase of 96,059 hours from 99,654 to 195,713 hours. The number of responses has increased by 321, from 546 to 867. Additionally, the burden for Appendix A has been re-estimated. Previously, it was erroneously calculated based on the number of licensees, rather than on the certifying entity requirements.

Level of Concurrence:

Branch Chief
Rulemaking and Guidance Branch
Division of Industrial and Medical Nuclear Safety
Office of Nuclear Material Safety and Safeguards

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule:

All retentions are in accordance with standard retention periods.

Search of the Information Requirements Control Automated System (IRCAS):

IRCAS was searched. No duplication was found.

Abstract:

10 CFR Part 34 establishes radiation safety requirements for the use of radioactive material in industrial radiography. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected and that licensee possession and use of source and byproduct material is in compliance with license and regulatory requirements.
