Subject: Major Revision of Part 35

We received a "cc" of your memorandum dated April 10, 1998, requesting certain program offices review the Proposed Rule package. We took a quick look, and find the proposed revision an excellent product and fully support its publication. We do have one comment for your consideration. In the draft NUREG-1556, Volume 9, we note that in some sections (e.g. 8.34, p. 106) the NUREG specifies that implementing procedures be "written" procedures. In other sections, we only specify the need for procedures (without clarifying that they be written). We suggest that we either consistently specify "written" or delete "written" where it is specifically used and note in an introductory section that procedures must be written.
