SUBJECT: IMPLEMENTATION STATUS OF INDEPENDENT SPENT FUEL STORAGE
INSTALLATION INTERIM COMPENSATORY MEASURES (TAC NO. MC2905)

Dear Mr. Parrish:

The Nuclear Regulatory Commission (NRC) issued Order (EA-02-104) to all holders of general and specific licenses of Independent Spent Fuel Storage Installations (ISFSIs) on October 16, 2002, requiring implementation of security-related interim compensatory measures (ICMs). Since October 16, 2002, the NRC has issued by Order the same ICMs to six additional facilities. Although the NRC did not require licensees to modify their ISFSI physical protection plans in response to these Orders, the NRC staff reviewed all licensee responses to these Orders and concluded that they were acceptable.

Subsequently, the NRC issued Order (EA-03-086) dated April 29, 2003, to all power reactor licensees that required them to modify their physical security, safeguards contingency, and training and qualification plans mandated by 10 CFR 50.34(c), 50.34(d), and 73.55(b)(4)(ii) to provide protection against the revised Design Basis Threat (DBT). The Order further required that these revised power reactor security plans be submitted to the NRC by April 29, 2004.

Several licensees with ISFSIs included ISFSI-related security provisions in their revised power reactor security plans. However, the NRC does not intend to review ISFSI-related security provisions as part of its review of the revised power reactor security plans submitted in response to the April 29, 2003, Order. The NRC staff at this time, seeks to ensure that ISFSI-related security provisions implemented in response to the ICMs remain unchanged.

To achieve this aim, the NRC is requesting that those licensees who are in receipt of this letter respond in writing, within 10 days from the receipt of this letter, stating whether or not their implementation of ISFSI-related security provisions of the ISFSI ICM Orders have been modified or revised since responding to the ISFSI Orders described above. If no modifications or revisions which decrease the effectiveness of the implementation of ISFSI-related security provisions have been made, a statement to that effect will suffice as an adequate response to this letter. Where modifications or revisions which decrease the effectiveness of the ISFSI-related security provisions are proposed, provide detailed descriptions of those modifications or revisions. NRC review and approval of the proposed modifications or revisions would be required prior to implementation.

J. V. Parrish
