

SUMMARY OF INFORMATION COLLECTION REQUEST

Title: 10 CFR Part 39, Licenses and Radiation Safety Requirements for Well Logging (Final OCP)

Current Burden/Responses: 27,352 hours/1,408 responses

Proposed Burden/Responses: 34,933 hours/1,800 (1,639 responses + 391 recordkeepers)

Frequency of Response: On occasion, every 10 years

Reasons for Changes in Burden/Responses:

The number of NRC licensees has decreased from 36 to 35, resulting in a burden reduction of 221 hours. The number of Agreement State licensees has increased from 90 to 126, resulting in a burden increase of 7,802 hours. Although the NRC burden has decreased slightly because there is one fewer licensee, overall the burden has increased by 7,581 hours because of the overall increase in licensees from 126 to 161.

Level of Concurrence: Section Chief,
Rulemaking and Guidance Branch
Division of Industrial and Medical Nuclear Safety
Office of Nuclear Material Safety and Safeguards

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule:
Recordkeeping retentions are in accordance with standard record retention periods.

Search of the Information Requirements Control Automated System (IRCAS):
IRCAS was searched. No duplication was found.

Abstract:

10 CFR Part 39, "Licenses and Radiation Safety Requirements for Well Logging," establishes radiation safety requirements for the use of radioactive material in well logging operations. The information in the applications, reports and records is used by the NRC staff to ensure that the health and safety of the public is protected and that licensee possession and use of source and byproduct material is in compliance with license and regulatory requirements.
