NOV 1 1965

Commanding Officer  
Harry Diamond Laboratories  
Connecticut Avenue & Van Ness  
Street, N.W.  
Washington, D. C. 20438

Dear Sir:

This refers to your application dated August 19, 1965, for a one curie source of Promethium 147.

We need to know the model number of the 3M source which you desire to procure. The information contained in Item 13 of the application does not provide information with respect to use and handling of the source. Although the general radiation protection program described in Supplemental Sheet 4 of the application contains general information, the review of applications from Harry Diamond Laboratories can be expedited if specific information relating to the particular byproduct material and form of the byproduct material is submitted. A reference to or submission of general information which is not specific to the material for which the application is being made requires additional correspondence so that information relating to the application can be obtained.

Very truly yours,

Nathan Bassin  
Isotopes Branch  
Division of Materials
