Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Glenn Adler

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Thomas Connor

Subject: Clear Conflict of Interest

CHAIRMAN REC'D
04 SEP 10 PM 1:14

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Lee King

CHAIRMAN REC'D

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Thomas Richards

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Brian Carey

Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

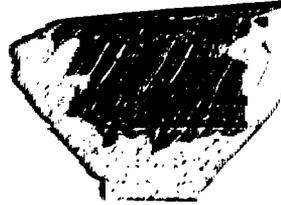

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Leo C. Helmer

Subject: Clear Conflict of Interest

CHAIRMAN REC'D
04 SEP 13 AM 8:32

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Ron Rattner

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Robin Lorentzen

I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Beth Bacon

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

CHAIRMAN REC'D
04 SEP 13 AM 11:33

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

THEODORE OLSON

Subject: Clearly Not a Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am pleased to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., and most of these officers having prior military experience protecting equally important vital interests, I find no conflict of interest. In fact, you are using the best trained officers to conduct these tests. It's not unusual for the military to test it's own and they have learned this is one of the most effective ways to train.

I am pleased the Nuclear Regulatory Commission would allow this kind of contract to go forward. The previously documented possible security deficiencies at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years have been corrected and improvements continue. Given the fact that Wackenhut already has been accused of learning when security drills were planned at a nuclear facility proves that Wackenhut also has the capability of gathering intelligence on an enemy force.

I am also very concerned about criticism of your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns, expressed by few, over whether or not your agency and the private utilities that own these plants, have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests will also help to not reveal possible weaknesses to an enemy.

I strongly urge you to stand your ground concerning your policy to blacken nuclear security test results and urge the NEI to continue with its force-on-force contract with Wackenhut. There is no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Alan Archer

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Andrew McDonald

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

John Lischalk

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Jason Pond

I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

keith badger

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

David Scoggins

Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Tom Farkas

CHAIRMAN REC'D
04 SEP 13 PM 3:22

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

John Barfield

Subject: Clear Conflict of Interest

CHAIRMAN REC'D
04 SEP 13 PM 4:33

Dear Chairman, Nuclear Regulatory Commission Diaz:

I'm very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I just do not understand why the NRC would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I'm especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants makes nuclear security even less accountable to the American people.

I would very much appreciate it if you would immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so that there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Thank you.

Sincerely,

Marcia Cooperman

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

David Webb

With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

John Ronches

CHAIRMAN REC'D
04 SEP 13 PM 4:38

Dear Chairman, Nuclear Regulatory Commission Diaz:

I can't believe that anyone truly believes it makes sense for Wackenhut to be testing "itself" in drills simulating terrorist attacks. Independent oversight is the bedrock of truth. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest. It is pretty hard to imagine anything other than Wackenhut finding that in general Wackenhut is overall doing a good job.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Ethan Fineout

I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Catherine Marciniak

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Maxfield Flynn

CHAIRMAN REC'D
04 SEP 13 PM 4:41

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Naomi Burns

CHAIRMAN REC'D
04 SEP 14 AM 8:53

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Cathleen Tarnawski

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest. The fox is guarding the henhouse, so to speak; Wackenhut guards almost half the nuclear plants in the country, and now they will be testing themselves to see if that security is adequate.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that the administration is doing everything it can to keep nuclear plants safe, that there is public accountability within our federal agencies, and that proper oversight of America's nuclear facilities is secured.

Sincerely,

GRACE PUBLIC FUND, by Leslie Seff

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results,

I also urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

It seems irresponsible that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

Furthermore, I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward. There have been numerous and documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years.

I am especially shocked, given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

Our security is in your hands and I would like to see concrete and timely actions taken to insure proper security in our nuclear facilities.

Sincerely,

Abhaya Thiele

04 SEP 14 AM 8:39

Dear Chairman, Nuclear Regulatory Commission Diaz:

This issue is much too important to allow anything but the very best in security testing. Mistakes here could cause real harm!

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Sherry Redd

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Carol Jeffery

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Robert Pancner

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Frank Romano

04 SEP 14 AM 8:44

Dear Chairman, Nuclear Regulatory Commission Diaz:

The Nuclear Energy Institute has created a conflict of interest, when it hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. Wackenhut provides security officers at almost half the nuclear plants in America.

Why would the Nuclear Regulatory Commission permit this, especially with the new policy of secrecy regarding plant problems, and with the documented security problems at nuclear plants and weapons facilities.

Worse still, Wackenhut has been found cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

The public no longer can trust nuclear power. First, the public is prevented from knowing test results. Second, Wackenhut cheats. Third, Wackenhut will be testing itself.

Reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Jan Saecker

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

H. Elaine Engel

I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Michael Kovacs

CHAIRMAN PFC'D

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Merry McLoryd

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Jennifer M Weishaar
