Dear Mr. O'Dowd:

We have reviewed the changes to New Hampshire Radioactive Materials License No. 382R, received by our office on March 17, 2003 and issued to the Trustees of Dartmouth College. Our review and comments are in response to the State's request for Nuclear Regulatory Commission (NRC) evaluation of the license conditions in New Hampshire Radioactive Materials License No. 382R and that incorporated the amendments identified on the States Regulation Status Data Sheet (SRS). These regulations were reviewed by comparison to the equivalent NRC rules in 10 CFR Part 36. We discussed our review of the license conditions with you on September 16, 2004.

As a result of our review, we have no comments. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that a State regulation meets the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final State regulation. However, since these regulations are incorporated by license condition into an active license, we have concluded they would meet the compatibility and health and safety categories established in the Office of State and Tribal Programs (STP) Procedure SA-200. No further correspondence on this matter is needed.

The SRS Data Sheet summarizes our knowledge of the status of other New Hampshire regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hrsd.ornl.gov/nrc/rulemaking.htm>. If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or Duncan White at 610-337-5042 or by e-mail at adw@nrc.gov.

Sincerely,
