Subject: Re: REVISION OF 10 CFR PART 35, MEDICAL USE

Cathy,

The OCIO has reviewed the subject draft Commission Paper and concurs in it. However, we note that NMSS does not indicate its recommended course of action. Depending on the Commission-directed course of action, there could be information collection impacts. We will have to wait and see. In the last paragraph under "background," the term "uncompleted" is used. You may wish to change it to "incomplete."

Thanks,

BS
