Subject: OCFO review: Proposed Rule 10 CFR Part 35, Medical Use of
Byproduct Material

NOTE TO: Catherine Haney, NMSS/IMNS
Diane Flack, NMSS/IMNS

OCFO has reviewed the proposed paper, Proposed Rule: Revision of 10 CFR Part 35, Medical Use of Byproduct Material and concurs in the package with no changes. This confirms the verbal concurrence provided to Catherine Haney this morning.

If the Commission selects Option 3, Perform a risk assessment, OCFO will expect to review a cost estimate for the type of risk assessment chosen (Option 3A: formal risk assessment for the entire rule; Option 3B: formal risk assessment focused on the diagnostic modalities; or Option 3C: relative risk assessment), and will want to know how NMSS proposes to fund the chosen option.

Feel free to call me if you have any questions.
