Re: Physical Security Plan Revision 8

In a letter dated 10 February 2003, the University of Arizona Nuclear Reactor Laboratory (NRL) informed the NRC of several revisions to the NRL Physical Security Plan. It has come to our attention that the cover page for the security plan was marked as "Draft Revision 8". What the NRC actually received was Revision 8 not a draft. Also, the change pages included had those changes marked in Italics.

Enclosed are three (3) copies of the corrected cover page, with the word "Draft" removed and the changed pages with the Italics removed.

Note: This does not change or revise the Physical Security Plan for the NRL, it correctly removes the label "Draft" from the plan and removes the italics from the previously changed pages so the NRC copies are clean.
