

MEDPS-PC

19 February 1962

Isotopes Branch
Division of Licensing and Regulation
U. S. Atomic Energy Commission
Washington 25, D. C.

Gentlemen:

Recommend approval of the inclosed application for renewal of Byproduct Material License No. 8-2534-7 for Diamond Ordnance Fuze Laboratories for 50 microcuries of Americium 241.

The radioisotope facilities at Diamond Ordnance Fuze Laboratories have not been recently surveyed by personnel of the U. S. Army Environmental Hygiene Agency. It has been recommended to Diamond Ordnance Fuze Laboratories that a request for a radiological health protection survey be initiated.

Sincerely,

SUBJECT: Renewal of Byproduct Material License No. 8-2534-7

TO TSG, DA FROM CO, USAEHA DATE 9 Feb 62 COMMENT NO. 2
ATTN: MEDPS-PO Col Penner/jp/24202

1. Recommend that the application for renewal of byproduct material license No. 8-2534-7, Diamond Ordnance Fuze Laboratories, Washington 25, D. C., be approved. The additional users added to the license have adequate training for use of the isotope in the quantity given.

2. Diamond Ordnance Fuze Laboratories was inspected by USAEHA on 23 February 1960 (Report of Radiological Hygiene Survey No. 3501R24-60).
