 Jodi: The new version is changed in a number of the comments. The old version is no more. We will transmit you the file soon. Meck is still trying to nail down DOE and DOD. We will give them till 1:00, then sed to you to send to IAEA.

 John -
 A previous version, sent to you by Farouk Eltawila on August 27, was then transmitted to the Commission via C-Note on August 30th. My question is whether or not THAT one should be sent along to the IAEA. Which leads me to the next question: Why did that take two weeks to figure out??

 I'm glad we got to this point. How was the previous version was sent up ? Whatever it was let's use the same method this time. If it was a JDL Gram that's fine, if it was a C Note that's fine. Let's be consistent. [I think it was a C Note but I'm not sure.]

 Sorry, what previous version? I have not sent anything to the IAEA. In any event, please have someone send me the version you have all agreed should be sent. This will avoid any confusion on my part.

 Jodi:
 The news is good. As of late yesterday afternoon, we had Carl's agreement that we should go with the latest version. Bob Meck still needs to complete a quick check this morning with the other agencies, and then we should press the send key.
 Also, since the previous version was provided to the Commission, Carl suggested that IP provide the version sent to IAEA to the Commission for their information, noting that it had agreement through the DEDO.

 I would like to remind all of you that if the IAEA does not receive any comments from the US by COB today, they will move forward with other Member State comments, all of which they have already received, and without ours. This means none of our comments will be taken into account in the next version of the document.

Jodi
