Subject: Re: DS-161 vs 1640

I think he was looking for a more specific listing of the numbers. But this may be the best he can hope for. I have the listing for specific nuclides:

	NUREG-1640 (revised) Bq/g	IAEA Bq/g
Co-60	0.17	0.1
Ni-63	>X10(3)	100
Sr-90	2	1
Tc-99	1.6	1
I-129	0.01	0.1
Cs-137	0.9	0.1
Ra-226	0.25	0.5
U-238	0.27	0.5
Am-241	0.17	1

Send these to him as well as Bob meck's e-mail.

Trish and Giorgio -

John Greeves sent the attached email early Monday morning. I propose responding to his request by forwarding Bob Meck's 3/6/03 email on this subject (attached).

Is this a sufficient response?

Tony

Can you send me a list of the current 1640 values in a table next to the 161 values in the same units bq/gm?

e-mail and fax will help. Thanks talk to you later today.
