Subject: Re: Commodities Clearance

To All:

We are coordinating comments through the Interagency Steering committee on Radiation Standards (ISCORS) as we have in the past. Bob Meck has distributed a copy. If you have specific comments please get them to Bob. This will be the third review for some of us.

The IAEA has issued for review and comment DS161 and the Safely Report on Radioactivity in Material not requiring Regulation for Purposes of Radiation Protection (attached). While I am not aware that we have a problem with them and they have been vetted thru WASSC and RASSC, this is our final opportunity.

A cable formally transmitting the above is in the works.
