This is due to EDO tomorrow and we are not ready. In the absence of feedback from the other ISCORS members I would suggest that you try to modify comment 1 first thing in the am because we need to get the package up to Ashok tomorrow. I'll look at it tonight and see if there is a way to tone down the first comment. If we are going to send it as it is, then we need to attach some evidence that this is a big concern of the States. Loren Setlow's views will not hold sway with Carl and all we will accomplish is to irritate him again this year.

Please draft a memo first thing in the am forwarding the package to EDO for dispatch to OIP. We will need to attach the responses we got from NMSS but we should send the revised package to Trish first thing in the am so we can get confirmation of their acceptance. I should have reminded you of this today. At the last minute, we cannot ask for an extension. I want to at least get it to Ashok tomorrow afternoon.
