CHAIRMAN REC'D

September 26, 2004 08:24 AM  
202-842-9868

04 SEP 27 AM 11:45

Chairman, Nuclear Regulatory Commission Dr. Nils J. Diaz  
Washington, DC 20555

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Adele Miller

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

charles smith sr.

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Catherine Hoskins

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Joseph Tice

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

John Hunter

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Bruce Campbell

Washington, DC 20555

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Cathy Link

Subject: Clear Conflict of Interest

CHAIRMAN REC'D  
04 SEP 27 AM 11:30

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Robert S. Lynch

Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Daphne T Stevens

CHAIRMAN REC'D  
04 SEP 27 AM 11:29

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Rosalyn D'Auria

CHAIRMAN REC'D  
04 SEP 27 PM 5:47

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Irina Droznina

Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Yours truly,

Chairman, Nuclear Regulatory Commission Dr. Nils J. Diaz  
Washington, DC 20555

Subject: Clear Conflict of Interest

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Subject: Clear Conflict of Interest

CHAIRMAN REC'D  
04 SEP 28 AM 9:58

Dear Chairman, Nuclear Regulatory Commission Diaz:

I am very concerned to learn that the Nuclear Energy Institute has hired the private security firm Wackenhut to conduct "force-on-force" security drills at nuclear power plants. With Wackenhut providing security officers at nearly half of all the nuclear plant sites in the U.S., this arrangement is a clear conflict of interest.

I do not understand why the Nuclear Regulatory Commission would allow this kind of contract to go forward, especially given the numerous, documented security problems at Wackenhut-guarded nuclear plants and U.S. nuclear weapons facilities over the past several years. I am especially puzzled given the fact that Wackenhut already has been caught cheating on security drills at a nuclear facility and received low marks on a force on force drill at a nuclear plant.

I am also very concerned about your agency's decision to "blacken" the results of security tests at U.S. nuclear plants. Given the security problems that have been publicly reported at nuclear facilities since September 11, 2001, there already are public concerns over whether or not your agency and the private utilities that own these plants have done everything necessary to ensure the security of these plants and the safety of the Americans who live in the areas surrounding the plants. Preventing the public from knowing the results of these tests now that Wackenhut will be testing itself at these plants, makes nuclear security even less accountable to the American people.

I strongly urge you to immediately reconsider your policy to blacken nuclear security test results and urge the NEI to cancel its force-on-force contract with Wackenhut, so there can be no doubt that our nation is doing everything we can to keep nuclear plants safe.

Sincerely,

Kent Minault
