

MAAP4 Information Exchange Meeting

On September 22, 2004, the Office of Nuclear Regulatory Research (RES) conducted a public meeting concerning the Modular Accident Analysis Program (MAAP) code used by licensees in developing site-specific probabilistic risk assessments (PRAs). There were about 40 attendees. The staff from RES and the Office of Nuclear Reactor Regulation (NRR) and the MAAP Code Users Group discussed comparisons between the results of NRC-sponsored thermal hydraulic codes and the MAAP code. Based on the discussion, the NRC staff plans to hold follow-on meetings to continue the technical exchange on codes assessment and usage in order to better evaluate the MAAP results used as justification for licensee risk-informed submittals.
