Subject: **COLUMBIA GENERATING STATION, DOCKET NO. 50-397;
SUPPLEMENTAL SUBMITTAL OF REVISED PAGES TO PHYSICAL
SECURITY PLAN (PSP) FOR COLUMBIA GENERATING STATION**

Reference: Letter dated September 21, 2004, NRC to JV Parrish (Energy Northwest),
"Security Plan Provisions for Enhanced Owner Controlled Area
Surveillance and Response (TAC NO. MC2905)"

Dear Sir or Madam:

As a result of an evaluation of lessons learned from NRC pilot force-on-force exercises, surveillance and response in the owner controlled area was identified as an area requiring further improvement. To address this, NRC provided in the reference, appropriate provisions that were developed in collaboration with the industry security working group and the Nuclear Energy Institute for inclusion in licensee's Physical Security Plans (PSP). Attachment 1 to this letter contains revised pages for the PSP Energy Northwest submitted for Columbia Generating Station. These revisions incorporate the provisions from the referenced letter as well as other revisions discussed with staff reviewing the PSP submitted by Energy Northwest.

SAFEGUARDS INFORMATION

NOTICE:

The attached information contains Safeguards Information. Upon separation from the Attachment, this transmittal letter is de-controlled.

**SUPPLEMENTAL SUBMITTAL OF REVISED PAGES TO PHYSICAL SECURITY
PLAN (PSP) FOR COLUMBIA GENERATING STATION**

Page 2 of 2

Energy Northwest wishes to stipulate that the analysis to support the revision to PSP section 6.1.2 included in Attachment 1 is not complete at this time. This analysis will be finalized before October 29, 2004.

If you have any questions or require additional information regarding this matter, please contact Mr. RJ Givin at (509) 377-2167.

Respectfully,

DK Atkinson
