**Subject:** Limestone Co. Alabama Groundwater

**Importance:** High

Limestone Co  
GW.xls (18 KB)

Hank:

Attached is a spreadsheet showing the groundwater wells in Limestone County Alabama per your request. We do not have the GIS capability to provide the information within a 2 mi. radius of Browns Ferry, therefore I have given you the entire county. I have included the city of the owner so hopefully this will help in narrowing down your list. If you have any questions or need any additional information, just let me know.

I apologize for taking so long with your request. It usually only takes a couple of days at the most, but we have been working on various priorities and tasks while preparing for our new director. I hope this information meets your needs and please don't hesitate to let me know if you need anything else. The response will be more prompt.

Leslie Durham
