**Subject:** Typographical Error in RAI Letter No. 7

As previously discussed with Mr. Grant, there is a typographical error contained in one of the NRC staff's Request for Additional Information (RAI) issued to Exelon in a RAI Letter No. 7 on July 26, 2004. Specifically, in the fourth sentence or RAI 2.5.4-1, the RAI states, "Please describe the criteria used to determine whether the **Uniform Hazard Spectrum** difference in soil properties was significant enough to require additional exploration." The phrase in bold above, "Uniform Hazard Spectrum" was inadvertently placed in the middle of this sentence and should be deleted. The sentence should read, "Please describe the criteria used to determine whether the difference in soil properties was significant enough to require additional exploration."

I apologize for any confusion this error may have caused.
