<b>SCENARIOS</b>		
	NOTE: Currently there are 6 SRO-I applicants, assume we use 2 examiners with 2 applicants (SRO and RO positions) and 1 surrogate (BOP) per scenario, use 2 scenarios total (plus one spare).	
ILT-N-1 and -2	Contain 2 events where SRO refers to TSs, but not identified in Overview writeup.	
<b>WRITTEN EXAM</b>		
Tier 2, Plant Systems / Group 1	Re: Clarifications for Rev.9, Issue #6: KAs 203000, K4.10 (RHR/LPCI Injection) and 261000, K3.06 (SGTS) were selected as SRO Only questions. Review to make sure these are not applicable RO knowledge. (May want to revise method of selecting KAs for Tier 2 SRO Only questions.)
