Subject: EML management moves on the NRC contract

Jean-Claude,

FYI - The Lab's management had a meeting this morning to address, among other things, the NRC contract. A recommendation to terminate the NRC contract is being rolled-up to Tony Fainberg of DHS. Tony manages the DHS Labs. The issue is whether DHS wants us to maintain our WFOs or devote our resources to DHS.

What you might want to do is compile a list of potential tasks that you would need us to do, along with an estimate of the funding the NRC would commit.

I'll keep you posted.
