MEMORANDUM TO: Robert A. Gramm, Chief, Section 2
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: Girija Shukla, Project Manager, Section 2 **/RA/**
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MEETING HELD ON OCTOBER 18, 2004, WITH THE WESTINGHOUSE OWNERS GROUP (WOG) TO DISCUSS TOPICAL REPORT (TR) WCAP-15981-NP, "POST ACCIDENT MONITORING INSTRUMENTATION REDEFINITION FOR WESTINGHOUSE NSSS PLANTS" (TAC NO. MC4524)

On October 18, 2004, representatives of the WOG met with the staff to discuss TR WCAP-15981-NP, "Post Accident Monitoring Instrumentation Redefinition for Westinghouse NSSS Plants."

The WOG began the meeting with an overview presentation of the proposed WOG post-accident monitoring instrumentation redefinition program, including its objective to determine the post-accident monitoring instrumentation that should be included in the technical specifications based on the accident management usage.

The WOG further stated its plan to develop a generic methodology that will review design basis accidents, emergency response guidelines, probabilistic risk assessment, severe accident management guidelines, and the emergency plan. For plant-specific implementation, a generic methodology will be applied to determine which Regulatory Guide 1.97 instruments satisfy 10 CFR 50.36 Criterion 3 (Type A) and Criterion 4 (Category 1). A lead plant license amendment request will be submitted for NRC review and approval after applying the generic methodology to Beaver Valley Units 1 and 2.

Following the meeting, the staff expressed its appreciation to the WOG for the presentation. An attendance list is provided in the attachment. There were no members of the public represented at the meeting. The slides used during the meeting are available in ADAMS under Accession No. ML042930038.
