Subject: Report Input

I have attached my input so far. I could not find a convenient narrative description of the main generator relaying in the FSAR so I will contact PV to see if they have a good system description. I will complete my documents reviewed list later today and forward. Note: I wrote most of this before I looked at the sample input so some reformatting is obviously required. I wanted to get you something to look at now, however, so I am just sending you what I have.

Regards, George Skinner
