Subject: REP-Na1

Here are some facts:

NRC's Thadani signed the cover letter, ML0409201670, March 31, 2004, for RIL No. 0401. The caption for Fig. 1 includes the statement, "The lowest point at 80 microns is for a test that has been discredited."

EPRI's Yang recently reported, Paper No. 1094 at the September 2004 ANS LWR Fuel Performance Meeting, "The team that did this evaluation failed to reach a consensus on the validity of this test."

The NRC's RIL NO. 0401, ML040920189, includes Fig. 21, page 38, that is identical to Fig. 1 of ML0409201670 and the caption is the same with the exception that the following sentence is not there, "The lowest point at 80 microns is for a test that has been discredited."
