Subject: Environics Information

Mr. Meinholtz,

This email is in reference to your letter dated August 10, 2004. In order to complete the Environics registration certificate we will need a drawing of the label that will be placed on the M-90 and MGD-1, this drawing should be incompliance with the provisions of 10 CFR 32.29 including the Environics exempt distribution license number and the company's current name.

In addition, in order to transfer Sensor Applications, Inc., registration certificate NR-0174-D-101-E to an inactive status please provide the following information:

1. The total number of products sold; the number of products still in use;
2. The services (including source replacement and availability) the registration certificate holder will still provide to users of the product or the identification of an entity that will provide services;
3. A commitment that the registration holder will no longer commercially distribute the product; and
4. Verification that no changes were made to the product since its initial registration or last amendment.

Please let us know which address to send the inactivated Sensor Applications, Inc., registration certificate and the terminated exempt distribution license.

Thank You,

Tomas Herrera
