Subject: Re. License Termination			
<p>Summary:</p> <p>I called Mr Rivera to discuss the status of their license termination. He stated that they had hired a consultant to perform a survey in support of the termination request. He stated that the consultant needed additional time to put together the report from the survey, and he requested an additional extension on this licensing action. Because the action had already been extended, and has been open for so long, I told Mr Rivera that we were going to void this action, and that a new action would be opened when they submit the survey. I told Mr Rivera that voiding this action does not reflect on the licensee and would not impact the review of the termination request. He agreed with voiding the action, and will send in a new request to terminate the license when the survey report is complete.</p>
