April 29, 2004 (W3F1-2004-0034), letter to Document Control Desk, Supplemental Response to the April 29, 2003 Orders to Entergy

NRC Letters from Samuel J. Collins to Holders of Licenses for Operating Power Reactors as listed in Enclosure 2, dated April 29, 2003 Regarding Issuance of Order Requiring Compliance with Revised Design Basis Threat for Operating Power Reactors (EA-03-086), Issuance of Order for Compensatory Measures Related to Training Enhancements on Tactical and Firearms Proficiency and Physical Fitness Applicable to Armed Nuclear Power Plant Security Force Personnel (EA-03-039)

Dear Sir or Madam:

The NRC issued Orders dated April 29, 2003: EA-03-038, *Order for Compensatory Measures Related to Fitness-For-Duty Enhancements Applicable to Nuclear Facility Security Force Personnel*; EA-03-039, *Order for Compensatory Measures Related to Training Enhancements on Tactical and Firearms Proficiency and Physical Fitness Applicable to Armed Nuclear Power Plant Security Force Personnel*; and EA-03-086, *Order Requiring Compliance with Revised Design Basis Threat* (collectively referred to as "Orders") for Waterford 3 Steam Electric Station (W3). In addition to other requirements, the Orders required nuclear power plant licensees to revise their physical security plans, safeguards contingency plans, and security force training and qualification plans; submit those plans to the NRC for approval by April 29, 2004; and complete implementation of

NSIROS

those plans by October 29, 2004, unless a request for a schedule extension for one or more elements of those plans was approved by the NRC.

On October 4, 2004, Entergy filed a Supplemental Response to Order EA-03-086 as documented in letter W3F1-2004-0088, that contained the Physical Security Plan, the Contingency Plan, and the Training and Qualification Plan as required by Order EA-03-086 for W3. By letter dated October 28, 2004, the NRC issued a Safety Evaluation Report documenting the NRC's review and acceptance of those plans. Section III.C. of Order EA-03-086 required Entergy to advise the NRC when implementation of the physical security plans, safeguards contingency plans, and general training and qualification plans has been accomplished. Section III.C.2. of Order EA-03-39 required Entergy to advise the NRC when full compliance with the requirements in Attachment 2 to that Order have been achieved.

Entergy hereby certifies that those conditions have been met, and the exercise of enforcement discretion pursuant to the Orders during the transition period will no longer be necessary.

This letter includes no new commitments.

I declare under penalty of perjury that the foregoing is true and correct. Executed on November 8, 2004.

Sincerely,

A handwritten signature in black ink, appearing to read 'T.G. Mitchell', written in a cursive style.
