Dear Sir or Madam:

The NRC issued Orders dated April 29, 2003: EA-03-038, *Order for Compensatory Measures Related to Fitness-For-Duty Enhancements Applicable to Nuclear Facility Security Force Personnel*; EA-03-039, *Order for Compensatory Measures Related to Training Enhancements on Tactical and Firearms Proficiency and Physical Fitness Applicable to Armed Nuclear Power Plant Security Force Personnel*; and EA-03-086, *Order Requiring Compliance with Revised Design Basis Threat* (collectively referred to as "Orders") for Arkansas Nuclear One (ANO). In addition to other requirements, the Orders required nuclear power plant licensees to revise their physical security plans, safeguards contingency plans, and security force training and qualification plans; submit those plans to the NRC for approval by April 29, 2004; and complete implementation of those plans by October 29, 2004, unless a request for a schedule extension for one or more elements of those plans was approved by the NRC.

On October 4, 2004 (0CAN100402), Entergy filed a Supplemental Response to Order EA-03-086 that contained the Physical Security Plan, the Contingency Plan, and the Training and Qualification Plan as required by Order EA-03-086 for ANO. By letter dated October 28, 2004 (0CNA100404), the NRC issued a Safety Evaluation Report documenting the NRC's review and acceptance of those plans. Section III.C. of Order EA-03-086 required Entergy to advise the NRC when implementation of the NRC approved physical security plans, safeguards contingency plans, and general training and qualification plans had been accomplished. Section III.C.2. of Order EA-03-39 required Entergy to advise the NRC when full compliance with the requirements in Attachment 2 to that Order has been achieved.

Entergy hereby certifies that those conditions have been met, and the exercise of enforcement discretion pursuant to the Orders during the transition period will no longer be necessary.
