RE: License Amendment (New Location of Use)
NRC License # 21-26050-01
Hayes Green Beach Memorial Hospital

Dear Sir/Madam:

The purpose of this letter is to amend our current NRC license to reflect the following changes.

Item #1 New location of use.

Please find the facility diagram of our new Nuclear Medicine Department. This area of use is located in the same building that is currently listed on our NRC license. We will forward a closeout survey of the old location once we have moved to the new location.

Please note there will be no use of Xe-133 gas at this facility. All sealed sources and radioactive waste will be stored behind lead shielding in addition to the typical lead containers. Please note that this facility is not a residence. Upon receipt of this amendment we will commence receipt and use of byproduct materials at this location.

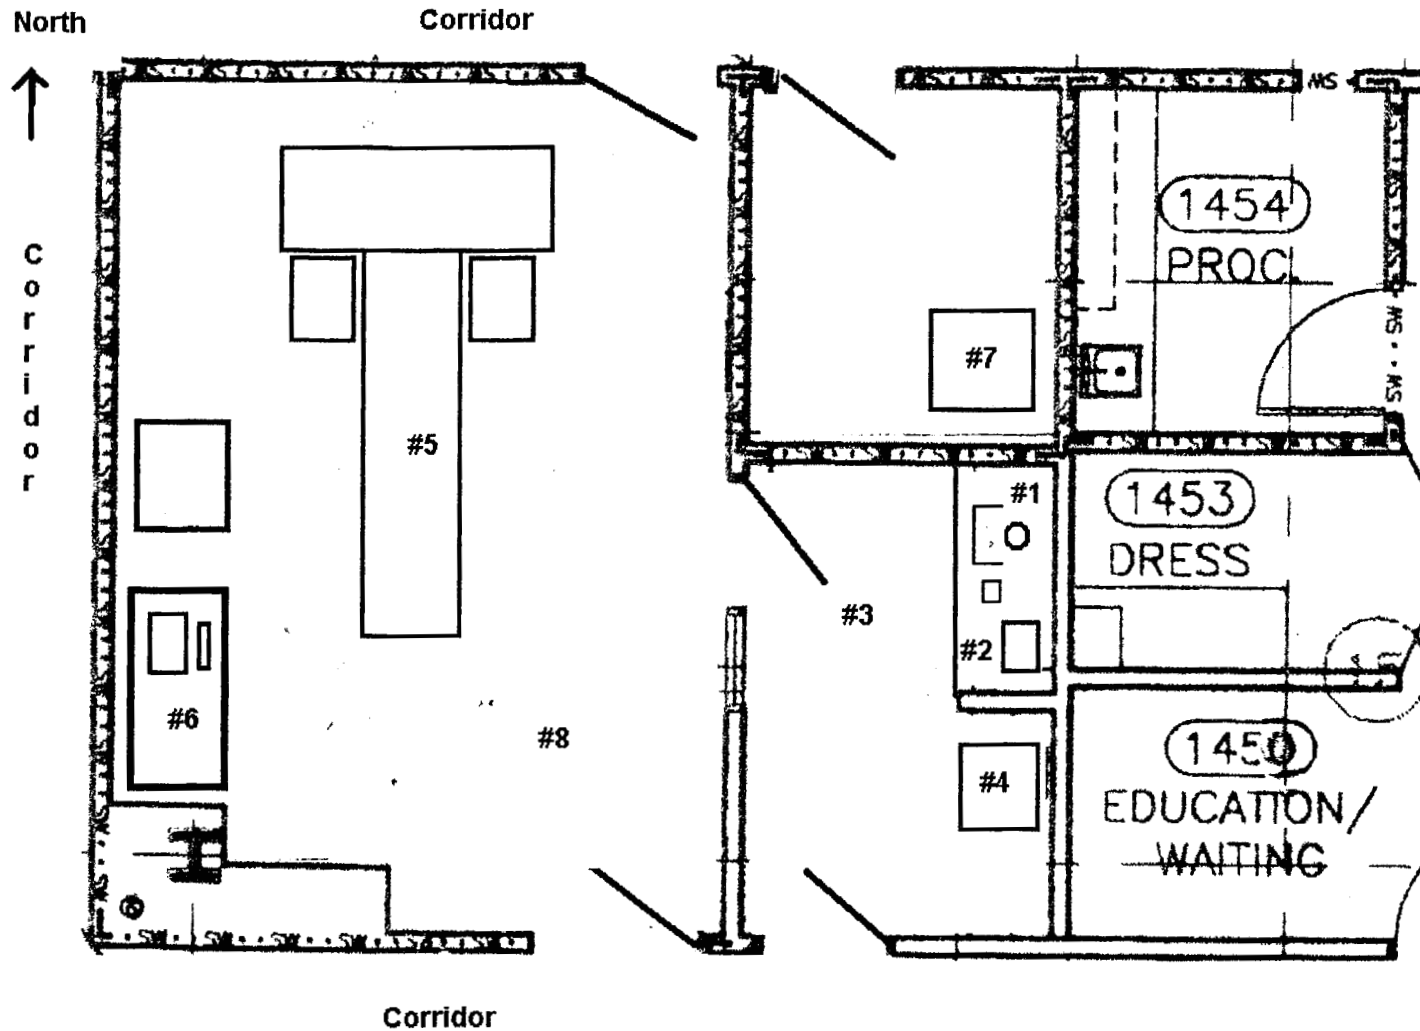

Thank you for your cooperation. If you have any questions or require additional information, please contact our physicist, James Botti at 734-662-3197 or by e-mail at jbotti@mpcphysics.com.

Sincerely,

Matthew W. Rush, CHE
President and CEO
