OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

It is extremely important that our nuclear power plants are fully protected from terrorist attacks. If they can't be protected due to lack of necessary money, then they should be closed down. We cannot afford expensive energy. But FAR more important than that, we cannot afford a successful attack on a nuclear power plant. An attack would do FAR more economic damage (to say nothing of the permanent damage to life and health of thousands of people and the environment) than having to raise energy prices or having to close down some plants.

Thank you.
