RECEIVED
REGION I

November 10, 2004

Donna Janda, Senior Health Physicist
Division of Nuclear Material Safety, Region I
U.S. Nuclear Regulatory Commission
475 Allendale Road
King of Prussia, PA 19406-1415

Dear Ms. Janda:

The New Jersey Department of Environmental Protection's (NJDEP) Bureau of Environmental Radiation (BER) reviewed the November 9, 2004 DRAFT document: (Docket No. 030-30416) *Environmental Assessment Related to an Amendment of the U.S. Nuclear Regulatory Commission Materials License No. 29-28152-01, Issued to AppTec Laboratory Services, Inc.*

The results of the fixed and removable contamination surveys indicate levels at or near background which comply with the Department's remediation criteria of 15 mrem/y (N.J.A.C. 7:28-12.8(a)).

The BER agrees with the Nuclear Regulatory Commission's Environmental Assessment conclusion that a Finding of No Significant Impact (FONSI) on human health and the environment is appropriate for the proposed action to terminate Materials License No. 29-28152-01 and release the facility at 1667 Davis Street, Camden, New Jersey for unrestricted use. This facility was formerly known as Quality Biologics, Inc. and Quality Biotech, Inc. Please note in form NRC314, AppTec stated: "Do NOT terminate license."

Thank you for giving us the opportunity to comment on this Environmental Assessment. Please contact Ed Truskowski at (609) 984-5542, if you have any questions.

Sincerely,

Patricia Gardner
Chief, Bureau of Environmental Radiation
