Subject: RE: FW: Manual Actions - A Methodology for Assessing Feasibility

Hi Gerry,

Thanks for the idea about a presentation.

I recently sent a copy of the article to Peter Koltay and John Hannon. Peter had expressed an interest in the methodology during the 2003 NEI Conference. I was still developing it and was about to perform a feasibility review using the methodology.

Probably I should get a plant that has used the ARS methodology to make the presentation. NEI is not very encouraging about activities by vendors.

I just received a request to perform an independent assessment of feasibility of a plant's Control Room procedure using the ARS methodology. Depending on the results, I could possibly be doing a review of all the fire areas.

Thanks again.

Ron Oates

Ron,
Have you considered presenting your effort as a paper/presentation at the NEI Fire Protection Forum this year?

Gerry

Subject: Manual Actions - A Methodology for Assessing Feasibility

Hi again,

Thought you might like to peruse an article that I wrote for the November 2003 edition of the "Fire Protection Community of Practice" newsletter. The article is titled "Manual Actions - A Methodology for Assessing Feasibility".

I developed the methodology as part of an effort to document feasibility of manual actions at First Energy.
