

Sept 30th Vulnerability Study Report

Table of Contents

- I. Executive Summary (Basic Scenarios/Tasks/Status/Results)
- II. Introduction/Background
- III. Modeling/Analyses/Results/Uncertainties
 - a. (^{Ex 2}) into HI-STORM
 - i. Introduction
 - ii. Structural
 - 1. Jetliner
 - 2. Jetliner Components
 - 3. Canister Failure due to Thermal Loading
 - iii. Thermal
 - 1. Jet Fuel Pool Fires
 - 2. Cask Time-Temperature History
 - iv. Scenarios that Lead to Radioactive Release
 - 1. Source Terms
 - a. Rod-to-Cask Release
 - b. Cask-to-Environment Transport/MELCOR
 - 2. Consequences
 - b. (^{Ex 2}) into UMS
 - i. Introduction :global analysis not needed
 - ii. Structural
 - 1. Jetliner Components
 - 2. Canister Failure due to Thermal Loading
 - iii. Thermal
 - 1. Jet fuel Fires
 - 2. Cask Time-Temperature History
 - iv. Scenarios that Lead to Radioactive Release
 - 1. Source Terms
 - a. Rod-to-Cask Release
 - b. Cask-to-Environment Transport/MELCOR
 - 2. Consequences
 - c. Small Plane Survey
 - i. Survey Results
 - ii. Structural Issues: airplane mass/ ^{Ex 2} prop tearing of cask
 - d. (Scenarios)
 - i. Introduction:) and are the same ^{Ex 2}
 - ii. Cask Response to Loadings
 - 1. UMS
 - 2. Hi-Storm
