GAO Audit and Technical Meeting with Sandia National Laboratory on Vulnerability Analyses for Transportation and Storage of Spent Fuel and Transportation of Radioactive Material (Non-Spent Fuel)

On October 7-8, 2002, a staff member from the Spent Fuel Project Office (SFPO) attended a GAO audit at Sandia National Laboratory (SNL) for the contract to perform the vulnerability analyses of Transportation package and Storage cask for Spent Nuclear Fuel. On October 9, 2002, the staff member had a technical meeting and program review with Sandia on the same contract. On October 8, 2002, the NRC received a preliminary report on the analysis SNL is performing to evaluate the effects of a large aircraft impacting onto a concrete storage cask and metal-walled spent fuel transportation package. The preliminary results show that
