Docket No. 40-8452
Source Material License No. SUA-1310

Attn: Richard Weller, Project Manager

Dear Mr. Weller:

This letter, with attachments, is being submitted as the annual surety bond update to satisfy the requirements of License Condition No. 27 of Source Material License No. SUA-1310 issued to Bear Creek Uranium Company. Despite the CPI-U inflation for 2004 the surety remains virtually the same as last year due to the predicted corporate costs being lower based on actual cost experience in 2004 and the land exchange being virtually completed with the State of Wyoming. The existing surety of \$854,000 remains sufficient.

All Wyoming DEQ and NRC reclamation requirements at Bear Creek Uranium were completed in 1999. The only activity at the site in 2004 was the required groundwater sampling. The surface of Section 16 was purchased from the State of Wyoming in January 2003, and we have negotiated a land exchange with the State of Wyoming to acquire the mineral estate in Section 16. The exchange has been public noticed and public meetings were held on the exchange and all comments received were positive. The exchange will be presented to the Wyoming State Land Board for approval at their next scheduled meeting December 2, 2004.

The existing surety arrangement, whereby the State of Wyoming holds a bond for all reclamation, including the NRC portion, will be continued until the mine permit is terminated, if termination of the mine permit occurs prior to transfer of the site to DOE, Anadarko will provide the proper surety to NRC prior to terminating the Wyoming DEQ surety arrangement. The existing surety with Wyoming DEQ is \$875,000; however with the submittal of our annual report to DEQ due November 18 we are requesting DEQ's concurrence to terminate the mine permit and obtain final bond release on the DEQ reclamation.

If you have questions concerning this submittal contact me at (307) 352-3304 or by email at Ernie_Scott@anadarko.com.

Sincerely,
