Isotope Products Laboratories
Attn: Cary Renquist
Radiation Safety Officer
24937 Avenue Tibbitts
Valencia, CA 91355

Gentlemen:

Enclosed is Amendment 10 renewing NRC License No. 04-16778-01E in its entirety.

Please review the enclosed document carefully and be sure that you understand all the conditions. If there are any errors or questions, please contact me so that appropriate corrections and answers can be provided.

Note that your license continues to reference Letter dated May 18, 1994, in Condition 13. Although your application indicated that you were attempting to renew the license in its entirety and you refer to an appendix involving quality control procedures with regard to 10 CFR 30.15 (10 CFR 32.14) products, you also need to provide complete details of the radiation detection instruments containing internal calibration sources as specified in 10 CFR 32.14 in order for us delete reference to the previous correspondence. My review found that in Amendment 06 of the license, it specifically referred to the May 18, 1994, letter as identifying and describing the radiation detection instruments you are authorized to distribute. Please note that your license only authorizes to distribute the devices identified in that letter pursuant to 10 CFR 32.14. If the information in the May 18, 1994, letter no longer accurately identifies and describes the radiation detection instruments you distribute or wish to distribute, you should amend your license to ensure it reflects correct and up-to-date information regarding these products.

Please be advised that you must conduct your program involving radioactive materials in accordance with the conditions specified in your NRC license, representations made in your license application, and other rules, regulations, and orders of the U. S. Nuclear Regulatory Commission, now or hereafter in effect, to include the following:

1. Comply with applicable NRC regulations in 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material"; 10 CFR Part 32, "Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material"; and other applicable regulations.

NOTE: Licensees authorized to distribute or initially transfer products containing byproduct material must also possess a valid possession license issued either by NRC or an Agreement State(s) which authorizes possession and use of byproduct material.

2. Distribute only those products containing radioactive material which are specifically authorized in your license.

3. Notify NRC in writing within 30 days of any change in mailing address.
4. Request and obtain appropriate amendments if you plan to change control or ownership of your organization, change locations of distribution of products containing radioactive material, or make any other changes in your program which are contrary to the license conditions or representations made in your license application and any supplemental correspondence with NRC.
5. Submit a complete renewal application or termination request at least 30 days before the expiration date on your license. You should receive a reminder notice approximately 90 days before the expiration date. Continued distribution of products containing radioactive material after your license expires is a violation of NRC regulations.
6. In accordance with 10 CFR 30.36, request termination of your license if you plan to permanently discontinue activities involving distribution of products containing radioactive material.

You will be periodically inspected by NRC. Failure to conduct your program in compliance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action(s) against you. This could include issuance of a notice of violation; proposed imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the "General Statement of Policy and Procedures for NRC Enforcement Actions," (NUREG-1600).

In accordance with 10 CFR 2.790 of NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in NRC's Public Document Room or from the The Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC web site at <http://www.nrc.gov/reading-rm.html> (the Electronic Reading Room).

If you have any questions, you may contact me at (301) 415-7826.

Sincerely,

/RA/

J. Bruce Carrico
