Subject: Transportation Security Administration request for additional information concerning Application for Renewal of License, Control No.: 135725

Reference: License No. 29-13141-06, Docket 03030808

Dear Ms. Ulrich:

This office is in receipt of your letter dated October 28, 2004, subject as stated above.

1. To address the location of where licensed materials will be used: The license should state Buildings 315 and 319. In the previous correspondence Building 318 was listed. This was an error. Only Buildings 315 and 319 will be used.
2. Regarding the use of hydrogen-3: When the license renewal application was submitted there were no longer any machines containing hydrogen-3 at the Transportation Security Laboratory. The machine that contained hydrogen-3 was evaluated and sent back to the manufacturer. In anticipation of future evaluations, it is requested that the use of hydrogen-3 remain on the license.

If you have any questions regarding this response, please contact Mr. Paul Jankowski at 609-813-2838.

Sincerely,

Kenneth J. Hacker
Director of Administration, TSL-1
