Three Mile Island Nuclear Power Station, Unit 1
Facility Operating License No. DPR-50
NRC Docket No. 50-289

Subject: Three Mile Island Nuclear Power Station, Physical Security Plan,
Revision 1

In accordance with 10 CFR 50.54(p)(2), "Conditions of licenses," AmerGen Energy Company, LLC (AmerGen), intends to revise the Three Mile Island Nuclear Power Station Physical Security Plan.

Revision 1 will include the following change.

- The Physical Security Plan (PSP) will be revised to change the current escort to visitor ratio for the Vital Area. Currently, the PSP states that the ratio is 10 visitors to 1 escort. The ratio will be reduced to require a maximum of only 5 visitors to 1 escort while within the Vital Area.

As required by 10 CFR 50.54(p)(2), AmerGen will perform an evaluation to determine whether or not this change decreases the safeguards effectiveness of the Three Mile Island Nuclear Power Station Physical Security Plan.

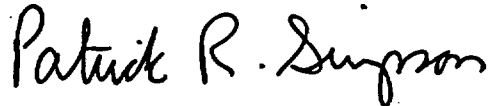

The change to the Three Mile Island Nuclear Power Station Physical Security Plan will be completed no later than December 17, 2004. In accordance with 10 CFR 50.54(p)(2), this change will be reported to the NRC within 60 days of implementation of the revision of the Three Mile Island Nuclear Power Station Physical Security Plan.
